

Instructions for Use

GlucoRx Allpresan® diabetic Foam Cream BASIC

Intended purpose

GlucoRx Allpresan® diabetic Foam Cream BASIC is a medical device for the specific treatment of dry and sensitive foot skin in patients with diabetes mellitus. Its special properties also make it suitable for the treatment of wound edges. GlucoRx Allpresan® diabetic Foam Cream BASIC boosts the skin's barrier function, thus protecting against skin infections and ulcerations.

Properties

The specially designed active formula forms a breathable, two-dimensional protective coating. It strengthens the barrier function, protects against external impacts, and reduces mechanical stresses such as friction without impairing natural skin function. The skin is optimally supplied with moisture, and Pentavitin® also guards against moisture loss. Reduces roughness, counteracts pressure marks and smooths the skin.

Use

Mornings and evenings, apply an amount about the size of a hazelnut or walnut to the affected areas of the feet. Also beneficial for use between the toes. GlucoRx Allpresan® diabetic Foam Cream offers excellent convenience in use, since it is very easy to rub in. It can be applied very quickly without leaving behind an unpleasant greasy film. There is reduced risk of slipping, and you can put on your stockings – even compression stockings – immediately after use. Shake well before each use, and hold the container upright when applying (please ensure the can is in the upright position and do not tilt during use!)

MADE IN GERMANY

Never apply to the eye region or mucus membranes, or in open wounds. Do not use GlucoRx Allpresan® diabetic Foam Cream BASIC once the expiration date has passed. For external use only.

Side effects:

The use of GlucoRx Allpresan® diabetic may cause temporary skin irritation (e.g. burning, itching, red-dening), especially if the foam cream containing urea is applied to very irritated areas of skin.

Contraindications

Do not use if there is known sensitivity to any of the ingredients. Do not use on infants or children under the age of 5 years.

Interactions

Urea can increase the release of other active ingredients from other external-use products, and promote their penetration into the skin. Please ask your doctor or pharmacist if you are using other external-use products.

Ingredients

Aqua, Butane, Urea, Decyl Oleate, Octyldodecanol, Cetearyl Alcohol, Propane, Stearic Acid, Propylene Glycol, Glycerin, Glyceryl Stearate, Panthenol, Saccharide Isomerate (Pentavitin®), Undecyl Alcohol, Allantoin, Potassium Lauroyl Wheat Amino Acids, Palm Glycerides, Capryloyl Glycine, Sodium Lauroyl Sarcosinate, Sodium Citrate, Citric Acid.

Pentavitin® made by Pentapharm Ltd.

Product Information

The advantages of GlucoRx Allpresan® diabetic Foam Cream at a glance:

- Forms a breathable protective coating, with a specially designed active formula that strengthens and repairs the skin barrier
- Applies quickly, isn't greasy, rubs in effortlessly – Compression stockings can be put on immediately after application.
- Available in BASIC and INTENSIVE formulas

Urea

- Increases the moisture content of the skin's keratinous layer, thus making skin softer and more supple
- Stabilizes the skin's barrier function
- Relieves itchiness

Pentavitin®

- A moisturizing substance made from natural sugars
- Acts as a "moisture magnet" to improve the skin's moisture-binding ability
- Protects against dehydration

Panthenol

- Has a soothing and conditioning action
- Moisturizes
- Promotes the regeneration of the skin barrier
